What is Pixel Peeping? Pixel peeping (a term that typically takes on a derogatory tone) is the process of viewing an image at 100% (or greater) in order to examine pixels in minute detail, ostensibly with the intent of looking for pixel level defects. The Efficacy of Pixel Peeping

Why Pixel Peeping is (Mostly) a Waste of Time | Light Stalking

What is Pixel Peeping? Pixel peeping is when you view your images at 100% or greater magnification. So that means zooming in on the image on your camera's LCD screen or in your favorite image processing software. That may look like 100% view (or greater like 200%), or 1:1 depending on the program

used.

Is Pixel Peeping Holding You Back From Doing Better ...

By the time you finish post-processing an image, the differences in IQ (if any) are going to be very narrow. That being the case, I think people should stop stressing out about it so much. Stop splitting hairs, stop pixel peeping. That's not what real photography is about. Obsessing about IQ has become an obsession of diminishing returns.

stop pixel peeping: Open Talk Forum: Digital Photography ...

Pixel-peeping only really matters for wall-sized exhibition prints, not little 8"x10" family photos or anything you might view on a screen. New cameras are marketed as being an 'advance' on what went before, and so more megapixels and longer zooms are two popular areas in which technology can be tweaked
