A pipefitter or steamfitter is a tradesperson who installs, assembles, fabricates, maintains and repairs mechanical piping systems. Pipefitters usually begin as helpers or apprentices. Journeyman pipefitters deal with industrial/commercial/marine piping and heating/cooling systems. Typical industrial process pipe is under high pressure, which requires metals such as carbon steel, stainless steel, and many different alloy metals fused together through precise cutting, threading, grooving, bending

Pipefitter - Wikipedia

The strong and versatile The PipeFitter™ precisely aligns the pipe and the fitting and using a jacking process pulls and presses the pipe into the proper fitting insertion depth. The PipeFitter™ maintains proper alignment during assembly, and holds cemented connections to prevent the fitting from backing-off until the initial set time is achieved.
